**The Company:**

Lone Rock Resources is a fourth-generation family-owned timber company with a proud past and an exciting future. We manage approximately 150,000 acres in southwestern Oregon where we have been in business since 1950 and have a well-earned reputation as one of the top private forestry companies in the Pacific Northwest. Lone Rock is a fully integrated forest management company involved in a wide spectrum of forest activities including having in-house cutting, logging, trucking, road construction crews, engineering, land surveying, silvicultural operations, inventory, GIS, logging administration, and log marketing. Lone Rock's mission is to manage our forestlands for the greatest enduring value while enhancing the environmental, social, and economic integrity of our lands and communities.

**Position:**

Lone Rock Resources is seeking candidates for a Forest Engineer located out of our Roseburg, OR office. The successful candidate will work in Lone Rock's surveying and engineering department where he/she will join a team of hardworking, talented, and dedicated licensed engineers and surveyors who thrive in performing exceptional work in a productive environment. We are looking for a motivated team player who will provide quality input to our diverse company structure. The successful candidate will work primarily in Douglas & Jackson Counties, but may occasionally work in other regions in SW Oregon where Lone Rock operates.

In a typical year, the Lone Rock Engineering and Surveying Team performs design, engineering, and layout of 60 miles of both new road construction and reconstruction, including culvert and bridge design and road maintenance. In addition, Lone Rock surveys over 40 miles of property line annually. Successful candidates for the Forest Engineer position will demonstrate a willingness to work with state-of-the-art equipment while striving to increase accuracy, efficiency, and effectiveness for company operations.

**Job Duties:** Included, but not limited to:

- Road and harvest unit layout
- Road design, field narration, and road staking
- Neighbor crossing plat submittals
- Road project pre-work compiling and file management
- Road construction contract administration
- Road and bridge/structure inventory and inspections
- Property line traversing and marking
- Other duties including fire cache inventory, fire suppression, and road winterization

**Required Qualifications:**

- 4-year bachelor's degree in Forest and/or Civil Engineering
- Proficient in using computers with specific knowledge of CAD, RoadEng, survey mapping software (Traverse PC), and Microsoft Office Suite
- Good interpersonal communication skills and ability to work well with others
- Good analytical and organizational skills
- Ability to travel to different job locations within Southwest Oregon
- Physically able to work in harsh terrain and in various environments in inclement weather
- Ability to work independently
- A valid driver's license and a good driving history

**Preferred Qualifications:**

- Current Engineering Intern Certificate with the ability to obtain an Oregon Forest Engineering License within 5 years
- 2+ years experiences in an engineering/forestry related field
- 2+ years of experience in contract/project administration for road construction related projects
- Experience/knowledge of property line surveying, including the use of a total station and GPS

**Physical Requirements:**

- Walking and standing up to 10 hours per day in various terrain and weather conditions
- Carrying equipment up to 50 lbs.
- Working in an office environment up to 10 hours per day

**Benefits:** A Full Time Salary Exempt Position with:

- Medical, Dental, and Vision Coverage
- 401(k) with a company match and a discretionary Profit-Sharing Plan
- Paid Vacation and Holidays
- Life Insurance, Short and Long-Term Disability
- Company pickup truck
- Signing Bonus payable in 4 equal installments over a 12 month period

**About the Engineering/Surveying Department:**

Lone Rock currently employs two full time Forest Engineering graduates and Two Forest Operations Management graduates in its Engineering/Surveying Department:

- Weston Addington (OSU Forest/Civil Engineering 2014) is the Engineering Operations Manager and is licensed in both Engineering and Land Surveying. Weston is responsible for road construction layout and road structure design/management. He also supervises all staff in the Engineering/Surveying Department.
- Dan Saily (OSU Forest Operations Management 2010) is a Professionally Licensed and Head Surveyor for the Department. Dan is responsible for supervising and managing property line surveys on company owned land. Dan is also the primary coordinator of the company fire cache system.
- Tyler Nay (OSU Forest Engineering 2011) is the Coastal Forest Engineer who works primarily out of the Myrtle Point office. Tyler is responsible for overseeing the road construction layout, road administration, and R/W logging for Lone Rock's coastal properties.
- Brett Ragon (OSU Forest Operations Management 2018) is a Surveying Assistant and Instrument Man for the survey crew. Brett is responsible for property line survey layout, traversing, and line marking. Brett also co-manages the company fire cache system with Dan.

Additionally, the Engineering/Surveying Department employs one full-time Survey Assistant, two seasonal survey crew staff, and three summer intern positions.

Lone Rock Resources is a drug free equal opportunity employer.
